

## ABSTRACT

### Vehicle Cooling Radiator Arrangement

An arrangement of radiators (2-6) for a utility vehicle, <sup>e.g.</sup> an agricultural tractor, comprising three or more cooling radiators which together define a chamber (7), optionally with some of the walls formed by perforated plates instead of radiator elements. One of the radiator elements may be pivotally mounted with respect to the others to provide access to the chamber. The arrangement of radiators may be mounted on a common support (1).
